Shopper Insights

?

I think you need to be a little more explicit here in step two.

Shopper

IAA workshop, Belgrade, Sept. 29, 2012

Our Challenge is .. Attract, Engage and Converta

Changing shopper behaviour by influencing their environment will drive growth

Environment

Changing the environment will change shopper behaviour

Behaviour

Behavioural change drives growth and is the only way to grow the business

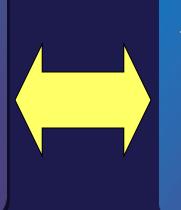

Growth

Our goal is to grow the business

Shoppers bring other influencers to the PoB – the environment can impact these too

<u>Shoppers bring other</u> influencers into the PoB

- Mood
- Mission / Trip Type
- Time
- Store / Brand Loyalty
- Expectations

<u>PoB Environment</u> <u>can help / hinder</u>

3 shopper modes influence the Purchasing Behaviour

Planned

Specific brand item on physical or mental list

Desired outcome for each shopper mode:

• Planned shoppers can find their planned purchases quickly and easily

Semi-Planned

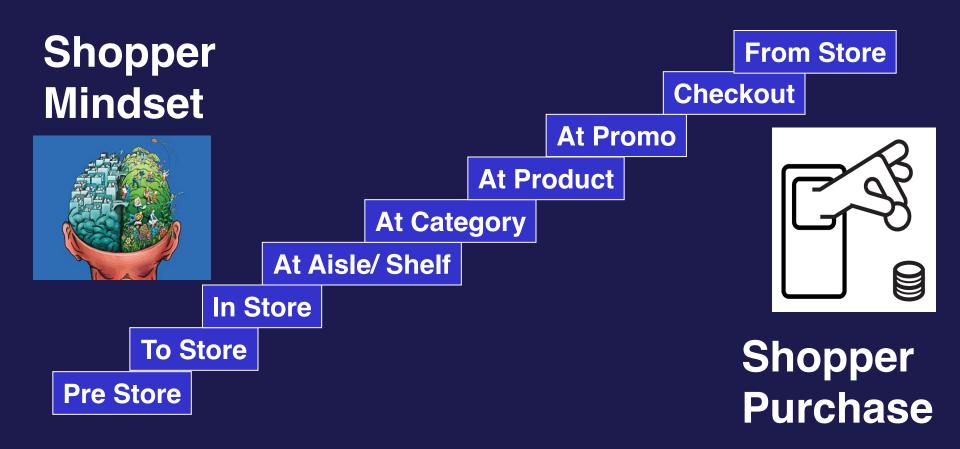

Category is on physical or mental list but no specific brand Semi-planned shoppers are able to orientate themselves quickly according to where they "enter" the category (e.g. at format / pack type, price range, flavour, ingredient, need, functional benefit, occasion, demographic...)

Impulse Neither category nor brand on physical or mental list Impulse shoppers find something that quickly catches their eye – something that excites them and gives them a reason to buy

Shopper path to purchase framework

Each step represents an opportunity to influence the shopper and enhance our <u>and</u> the retailer's offer

Step 1. Pre Store: 3 Key Considerations

Mindset

Shopping Mission

Recognize pre-defined mindset of shoppers

Base strategies on long-term trends

Base tactics on short-term trends Base strategies on your retailer's Most Valuable Shoppers. Tailor our offer to the specific segment/s needs.

IMPLICATIONS FOR YOU

Base assortment and merchandising on the specific targeted shopping mission/s.

Step 2. To Store: 2 Key Considerations

Location

Location is usually #1-3 driver of store choice

TESCO Carrefour

What criteria are important when a shopper decide where to shop?

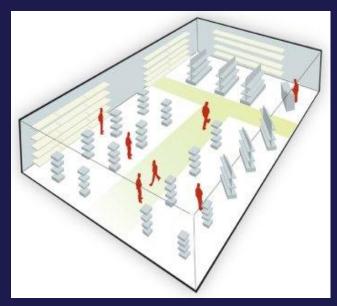

- Store Driver Analysis
- Shopping Habit Analysis
- Store Loyalty Analysis

What does the banner signal to a shopper?

- Shopper Trends
- Banner Equity Studies
- Banner Perception Studies
- Shopping Habits

Step 3. In Store: 2 Key Considerations

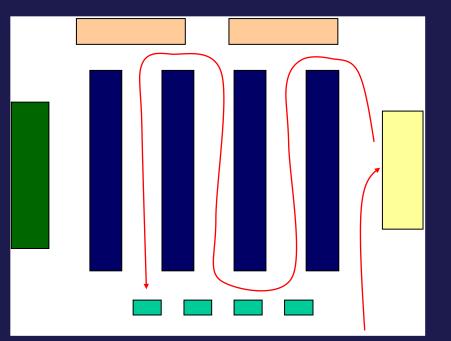

Store Layout

What is important in store for shoppers?

- Store Layout Analysis
- Shopping Zone Analysis

Shopper Path

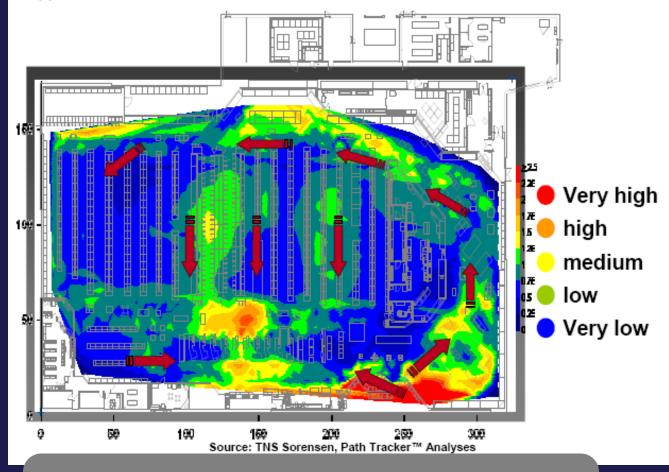

Which path do shoppers take and why?

- Shopper Path Analysis
- Touch points analysis

In store: Shopper Path showing hot spots

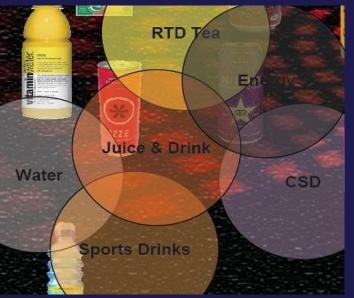

Which path do shoppers take and why?

You can increase sales by identifying hot spots along the Shopper Path and place our product where these hot spots are ...

Step 5. At Category: 2 Key considerations

Category Role & Definition

What is the shoppers frame of reference for the category?

- Category Definition
- Cross category Analysis
- Complementary Category Analysis

Category Assortment

Is category clear in shelf and easy to shop?

- Assortment Analyses
- Shelf share analysis
- Most Valuable Shopper
- Loyalty Card Data
- Decision tree analysis
- Virtual Reality

Step 6. At Product: 2 Key considerations

Finding Products

How easily can a shopper locate our products?

- Accompanied Shopping
- Eye Tracking/ Helmet
- Eye Tracking/ Virtual Reality

Choosing Products

How easily can a shopper choose what to buy?

- Shopper Experiments
- Shopping Behavior
- Brand Equity Studies

Step 6. At Product: 2 Key considerations

Desired brand experience v experience:

VS.

real in-store

Step 7: At Promo – create the interruption

Promotions to intervene in one of purchase steps

Communication vs. Purchase Barrier?

• A purchase barrier is an element of the product offering or retail environment that **prevents a shopper from purchasing a product**

 It can occur in-store, at the shelf, or out of store for existing brands/products or new initiatives

Purchase barrier examples:

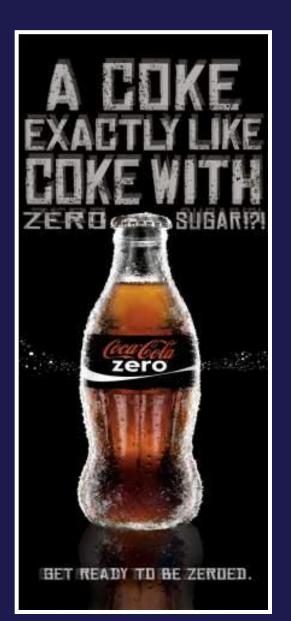

| LACK OF | "The brand (category) is not of interest to me" | PERCEIVED | "I know your brand but I don't need it now" |
|-------------------------|--|----------------------|--|
| LOW BRAND AWARENESS | <i>"I don't know much about your brand or the variants you have"</i> | POOR VALUE | <i>"I want your benefits but its just too expensive"</i> |
| LACK OF BRAND | <i>"I want your benefit but I don't see you in the store″</i> | CHOICE CONFUSION | <i>"I want your benefit but can't find the right one for my needs"</i> |
| UNCONVINCING BENEFIT | <i>"I don't believe you can deliver the benefit"</i> | USAGE UNCERTAINTY | <i>"I don't understand what your brand can do for me"</i> |

Addressing a Purchase Barrier – Lack of Interest

Addressing a Purchase Barrier – Lack Of Awareness

Addressing a Purchase Barrier – Lack Of Visibility

Addressing a Purchase Barrier – Unconvincing Benefit

+20% Lift in Sales

Aisle Traffic +28% Conversion +16% Category Sales +109%

Addressing a Purchase Barrier – Irrelevance

Addressing a Purchase Barrier – Poor Value

lams costs less than an apple

Addressing a Purchase Barrier – Confusion

Addressing a Purchase Barrier – Usage Uncertainty

Addressing a Purchase Driver – Call to Action

I am shopper... ... l like to be treated...with love and care!

Bringing Pleasure to the Confectionery Aisle

Distinct and bounded so the reader easily can see the order the sentences should be read in. Pages are consistently divided along the vertical axis and within each axis the reader moves from left to right and top to bottom.

Here the consumer has to deal with a fixture divided both vertically and horizontally both of which cut across the other – there is no logic or order for the consumer, so they are more likely not to see products or give up on the fixture.

A second second

Mart and the state of the state

Here are a couple of pages from an experimental book, called House of Leaves by Mark Z. Danielewski. In this book he breaks a lot of reading/writing conventions and as a result it is very, very difficult to read. Currently this is what many confectionery fixtures resemble.

This fixture is heading in the right direction – each section is divided into a discrete 'page' that is easily distinguishable from its neighbour. It still feels like a commodity however...

Rule 2. Segment at Eye Level

There are a number or problems with these signs, firstly they are too high up/far back for consumers to see and secondly they don't line up with the units beneath them. It feels as though the signage and the shelves are two separate things.

Rule 3. Bus Stops are better than Fins

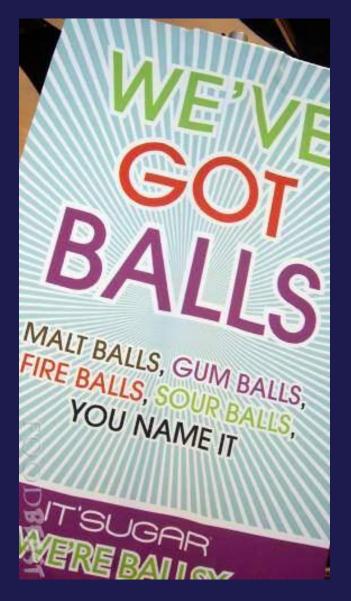

Fins while functionally useful for flagging segmentation to consumers, they do little to enhance pleasure – implying privacy and shame.

Rule 4. Invoke Pleasure

Don't do a Happy Eater

Rule 4. Invoke Pleasure

It doesn't all have to be about indulgence – adult humour will strengthen confectionery's appeal to adults.

Rule 5. The Unified Aesthetic

This is much better. This is an example of a 'unified aesthetic'. The shelving matches the shelving uses the same colour and design as the banner above.

It would be even better if the shelving to the left and right was also this colour.

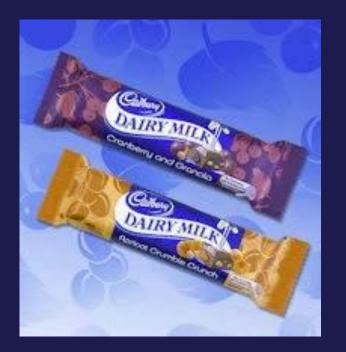

Rule 6. Confectionery can be Art

Nike display t-shirts and trainers as though they are objects of aesthetic interest, so why isn't confectionery displayed this way?

Rule 6. Confectionery can be Art

Cadbury can do 'art'

But it doesn't need to be restricted to special occasions, because every Cadbury occasion should be special!

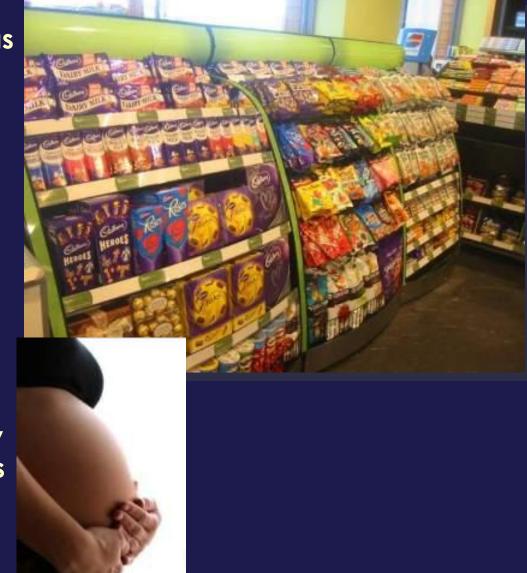

Rule 7. Use Curves

Vertical Curves:

The convex, vertical curve, as a semiotic sign, connotes pregnancy. This is full of useful associations:

- Abundance
- Providence
- Fecundity
- Nature
- Femininity

It's also a generous, welcoming way to display confectionery, that breaks up the display and adds some 3D elements.

Rule 8. Be Interactive

3D fixtures encourage consumers to become more interested in the mystery and excitement of discovery because they can't take the fixture in in one glance.

Consumers have a more physical and therefore more engaging relationship with the fixture.
